

## Press release

### International achievements manifested.

**In December 2011, the HKP association of real estate appraisers changed its name to HKP Value | Prof. Dr. Helmuth | Klaiber GmbH.**

HKP Value | Prof. Dr. Helmuth | Klaiber GmbH is a successful provider of real estate valuation. Aside from its activities in Germany, it has also been operating internationally, especially in France, for years. Thus, the logical conclusion has been the integration of these achievements in the name, too, manifesting it by the add-on “Value”. The former HKP association of real estate appraisers has completely merged into the new limited liability company. As before, it focuses on professional, high-level real estate valuations and consultant services, nationally and internationally. An annual valuation volume of several billion Euros is the positive proof of the company’s achievements.

**Stefan Klaiber**, a graduate engineer (UAS), has more than seventeen years of professional work experience as an architect in the field of planning, construction management, project control, real estate marketing and valuation. He is a certified real estate appraiser as regards mortgage lending value and market value (CIS HypZert (F/M)) and a Recognised European Valuer (REV) according to TEGoVA (The European Group of Valuers' Associations). Stefan Klaiber is also a member of the globally established Royal Institution of Chartered Surveyors (RICS) and an associate member of the American Appraisal Institute (AI). Since 2010, Mr Klaiber has been publicly appointed and sworn-in by the Hesse Chamber of Architects for the valuation of undeveloped and developed sites.

Mister Klaiber is the managing partner of HKP Value | Prof. Dr. Helmuth | Klaiber GmbH.

**Professor Jürgen Helmuth, EngD**, has been working as a real estate appraiser for more than twenty years, most of the time even as a publicly appointed and sworn real estate appraiser. He is an architect with many years of experience, having worked on several large-scale projects such as the enlargement of an exhibition centre, the construction of an airport terminal and the development of a convention centre. He is a professor of facade engineering, building construction and design, and he used to lecture at the “Hochschule für angewandte Wissenschaft und Kunst” (HAWK) Hildesheim/Holzminden/Göttingen.

Professor Jürgen Helmuth, EngD, is the executive director of HKP Value | Prof. Dr. Helmuth | Klaiber GmbH.
